

Reinhard Esteban

(Full Stack Web Developer)

PROFESSIONAL SUMMARY

Dynamic and solution-oriented Full-Stack Web Developer holding a Bachelor's degree in Information Technology. Skilled in engineering seamless user interfaces paired with secure, robust backend logic. Driven by analytical problem-solving and a passion for tackling complex technical challenges. Adept at building high-performance web applications that balance intuitive user experiences with optimal under-the-hood efficiency. Continuously evolving with emerging web technologies and eager to contribute value to innovative tech teams.

TECHNICAL SKILLS

- **Core Programming:** Python, JavaScript, PHP
- **Frameworks & Libraries:** Laravel, React, React Native, Vue.js, Inertia.js and WordPress Frameworks
- **Specialties:** Full-Stack Web Development, UI/UX Optimization, Secure System Architecture, API Integration

---

CAREER HISTORY

Freelance Software Engineer

My Own Projects | May 2022 – Present (4 years)

- Architected and deployed scalable web applications using modern JavaScript frameworks, optimizing performance and user experience while collaborating closely with clients to translate business requirements into clean, maintainable code.

- Integrated third-party APIs, database solutions, and cloud services to deliver robust, end-to-end digital solutions.
- Managed full project lifecycles independently, ensuring on-time delivery and adherence to high-quality software standards.

Senior Software Engineer

Hashed.IT | May 2025 – May 2026 (1 year 1 month)

- Engineered the intelligent systems and digital solutions powering the next generation of local industries.
- Integrated advanced AI solutions and optimized backend architectures to scale system capabilities.

Web Developer

Brandetize | Dec 2025 – Mar 2026 (4 months)

- Built and optimized the high-performing digital architecture driving company and client growth.
- Focused on engineering seamless marketing funnels, scaling robust lead generation systems, and managing platform maintenance to ensure flawless digital experiences.

Web Developer

Onda Fit | Jun 2025 – Dec 2025 (7 months)

- Served as one of the pioneer developers behind Onda Fit, building the definitive management platform and operational ecosystem for Philippine sports and wellness hubs (ranging from pickleball courts to Pilates studios).
- Optimized local business operations by streamlining scheduling systems, driving membership retention features, and integrating localized digital payment gateways including GCash and Maya.

Software Developer (Thesis Project)

Mater Dei College – Bohol | Jan 2025 – Apr 2025 (4 months)

- Developed the Mater Dei College Enterprise Management Platform.
- Built an Asset Management Engine to fully digitize equipment leasing and borrowing workflows, alongside an HR & Leave Automation module handling secure, digital leave requests.
- Independently managed the entire project lifecycle, solving tough technical challenges and integrating robust database and API solutions to deliver high-quality, scalable digital products.

EDUCATION

Mater Dei College

Bachelor of Science in Information Technology

San Agustin National High School

Senior High School – Programming & Animation (NCIII Certified)

JAPeR Memorial High School

Junior High School – TVL - ICT Track

Santa Catalina Elementary School

Elementary Diploma
